Underground Awareness™  
technologies for the  
installation and maintenance  
of buried pipe and cable.

## Subsite® Electronics History

Subsite Electronics was formed in 1988 to design and manufacture HDD guidance systems for Ditch Witch® drills. The business quickly flourished, expanding its product portfolio by 1991 to include a full line of HDD guidance systems and utility locating equipment. In the decades that followed, Subsite opened a new 30,000 square foot manufacturing and R&D facility and further expanded its product line to include equipment machine controls, Ground Penetrating Radar, and other advanced products.

Today, Subsite Electronics is one of eight companies that comprise Charles Machines Works, and our products are sold worldwide via a global network of Ditch Witch dealers. By listening to our customers, applying our passion for technology and providing outstanding after-sale support, Subsite Electronics has become the premier source of electronic solutions to support the installation and maintenance of underground pipe and cable.

## The Power of Underground Awareness™

Subsite® Electronics exists to provide underground construction professionals the power of Underground Awareness™.

Completing an underground construction project safely and efficiently requires a total awareness of the jobsite environment and the unique challenges each job presents. Whether it's the location of a buried utility, the depth and orientation of a drill head, or the precise control of HDD or trenching equipment, Subsite products give customers the confidence needed to get the job done and done right.

Subsite Electronics provides our customers the most comprehensive suite of electronic products in the underground construction industry. Our rugged, state-of-the-art offering includes utility locators, Horizontal Directional Drill (HDD) guidance systems, and equipment machine controls. At Subsite, we're committed to helping our customers utilize the power of Underground Awareness™ to improve the safety, productivity and profitability of their underground construction projects.

## Support

**Support Team:** Our product support team has more than 80 years of combined experience in the underground construction industry and is available to answer questions at any hour of the day.

**Repairs:** Authorized Subsite® Service Centers and select Ditch Witch® dealers are available globally for convenient repair service, and typically offer a 48-hour turnaround time.

**Software Updates:** Keep your Subsite products current with the latest software updates available at [www.subsite.com](http://www.subsite.com).
